Same or next business day shipping!
Custom patient supply kits available.

Dear hospital personnel,

As you know, water labor and water births are increasing rapidly in popularity with most care providers acknowledging the many benefits of this birth choice to both mother and baby. Hospitals and birth centers all across the United States are making this option available with either built in units or the more affordable option of portable, inflatable water labor and water birth pools.

We currently offer three water labor and birth pools for hospital and birth centers:

[La Bassine](#)

[Maxi](#)

[Birth Pool in a Box](#)

As we introduce you to our products in this e-letter, you can easily click on the links embedded in each products name. These links will take you to our web site and more detailed information about each product.

We thought you would enjoy seeing the products we carry that will help you meet the needs of your birthing patients. [YourWaterBirth.com](http://www.YourWaterBirth.com) is the largest retail supplier of water labor and water birth inflatable pools and supplies in the United States. We have successfully helped hundreds of hospitals provide water to their birthing families with custom systems.

We will be happy to assist you creating a systems that best meets your specific needs. Below we have created two product lists. The first list contains products that are single purchase products - products that can be reused. The second list is for products that are considered disposable - single use, as they come into contact with body fluids.

Many hospitals and birth centers we serve create a patient "Water Birth Kit" that we bundle and box per patient. These kits are typically purchased in 2-3 months supply quantities. They arrive labeled for easy identification and are typically broken out of the store room as needed and added to the patients room charge.

Some facilities buy Professional Grade birthing pools that can be used 10 times or more. With this system a new pool liner is used for each patient. Other hospitals have difficulty getting their infectious board to approve the reusable pool and create a patient kits that includes a pool along with their other disposable products.

Each of our products have many unique features. Our web site, www.YourWaterBirth.com, is designed to easily guide you to the products that will best meet your needs. We would be happy to discuss our products in greater detail over the phone if desired. You can reach us at 509-962-8630.
